1. Introduction

We are the Office for Health Improvement and Disparities (OHID) in the Department of Health and Social Care. We have a database called the National Drug Treatment Monitoring System (NDTMS), which we use to collect information about drug and alcohol treatment in England.

The National Drug Treatment Monitoring System (NDTMS) is at the heart of the existing system and is central to the new local authority led system. NDTMS data helps drug treatment demonstrate the outcomes it achieves for the people it treats and in doing so aids accountability for the money invested in it.

This document establishes the Reference Data in use within the CJIT dataset and will support software suppliers in implementing the dataset.

Reference data is defined as (relatively) static data. Generally, it is employed as a means of validating data entry and will typically be used to control the contents of drop-down lists etc

This document is intended to be a definitive and accessible source for use, primarily by OHID personnel. It is not intended to be read from end to end, rather as a reference document which is utilised by a variety of readerships, including:

- interpreters of data provided from OHID systems
- suppliers of systems to OHID
- suppliers of systems which interface to OHID systems
- OHID National Drug Treatment Monitoring System (NDTMS) personnel

2. Change control

Each significant change to the NDTMS data set is allocated a letter. The current version (commonly referred to as NDTMS dataset Q) for national data collection will come into effect on 1 April 2022.

As this document is the ultimate definition for NDTMS reference data, the behaviour of the NDTMS system must strictly adhere to the latest approved version of this document which can be found on the [gov.uk website](https://www.gov.uk).

For those data items defined by OHID (internal data), the details contained in this document are the master definitions of such data, extending to issues such as upper/lower case, hyphenation, punctuation etc.

For those data items not defined by OHID (external data – see [Appendix B](#)) this document defines the owner of the master data.

3. CJIT Data Items

3.1 Client stated sex – SEX

3.3 Country of birth – NATION

Country of birth, code selected from ISO 3166-1 alpha-3 standard.

[ISO 3166 Country Codes can be found online](#). To view list of codes, select the link to the [Online Browsing Platform](#) and refer to Alpha 3 codes. New permissible value added in core dataset H of 'Z – Not stated'.

3.4 Agency codes – AGENCY

Each Criminal Justice Intervention Team (CJIT) is assigned with a CJIT agency code. Responsibility for allocating a CJIT agency code is that of the relevant National NDTMS CJIT manager.

3.5 Consent for NDTMS – CONSENT

Code	Text	Comments	Sort
N	No client has not	-	1
Y	Yes client has consented	-	2

3.6 Postcode – PC

Postcode mappings are used to establish/validate the geographic areas in which a client is resident. Only partial postcodes should be submitted and must be separated by a space eg NW7 3.

Default post code for clients with no fixed abode is ZZ99 3VZ (submitted partially as ZZ99 3).

3.7 DAT of residence – DAT

A list of the partnership and DAT codes currently used for NDTMS is given in the NDTMS Geographic Information document.

3.8 Upper tier local authority – UTLA

A list of upper tier local authority codes to be used for NDTMS is given in the NDTMS Geographic Information document.

Appendix A – Drug codes and names

Individuals presenting to adult alcohol and drug treatment services are categorised by the substances they cite as problematic at the start of treatment. They are categorised by the following hierarchal criteria:

- Any mention of opiate use in any episode would result in the client being categorised as an OPIATE client (irrespective of what other substances are cited).
- Clients who present with non-opiate substances (and not opiates or alcohol) will be classified as NON-OPIATE ONLY.
- Clients who present with a non-opiate substance and alcohol (but not opiates) recorded in any drug in any episode in their treatment journeys will be classified as NON-OPIATE AND ALCOHOL.
- Clients who present with alcohol and no other substances will be categorised as ALCOHOL ONLY.
