WHEN AND HOW TO COMPLETE THE YOUNG PEOPLE'S OUTCOMES RECORD (YPOR)

Complete the green section within 2 weeks either side of the first intervention start date at the beginning of a young person's treatment journey.

All sections should be completed within 2 weeks either side of the discharge date of when the young person's treatment journey ends.

The questions in the green section should focus on the 28 days before the date the form is being completed. You can also complete the record at regular points during treatment (for example, at care-plan reviews), though this is not mandatory.

Start by entering the details of the young person and keyworker, and the date and treatment stage at which the form is being completed. The young person and keyworker should then complete this form together.

There are 5 kinds of questions:

(1) Days – the number of using days in the past 28 days. Use an event-based calendar with the young person to improve recall, but only record the total here.

(2) Quantity – the amount used on an average using day.

(3) Age – the age (in years) the young person first used the substance, whether or not this was first problematic use. Round down to get a whole number: for example, if the young person was 14 and a half, record the age as 14.

(4) Yes and no – a simple tick for yes or no.

(5) Ratings scale – an 10-point scale from poor to good. Together with the young person mark the scale at an appropriate place.

All information from the YPOR will be collected and reported to the same standards of confidentiality and security as other information collected during treatment. For more details, see the consent and confidentiality toolkit issued as part of the core dataset documentation.
