

NDTMS Core Dataset P: data items for all clients of providers reporting the YP dataset.

Client	
Initial of client's first name	!
Initial of client's surname	!
Client birth date	!
Client sex at registration of birth	!
Ethnicity	
Country of birth	

KEY	
Items that should be updated over time (eg at careplan reviews)	✓
Data items that, if changed, will generate a 'missing' record that will need to be resolved in the next NDTMS submission	!
New data item for CDS-P	Red Text

Episode	
Agency code	!
Client reference	
Software system used (auto generated)	
Consent for NDTMS	✓
Postcode	✓
DAT of residence	✓
Local Authority	✓
Referral date	!
Referral source	
Triage date	
Previously treated	
Accommodation need	
Pregnant	
Parental responsibility for a child aged under 18	
Do any of these children live with the client	
How many children under 18 in total live in client house	
What help are the children receiving (1)	
What help are the children receiving (2)	
What help are the children receiving (3)	
Problem substance number 1	
Problem substance number 2	
Problem substance number 3	
Healthcare assessment date	
Hep B intervention status	
Hep C intervention status	
Mental health treatment need	
Receiving treatment for mental health need(s)	
Care status	
Sexually exploited	
Self-harmed	
Involved in offending	
Education/employment/training status	
Registered with GP	
Engaged in unsafe sex	
Offered a screen for sexually transmitted infections	
Offered a screen for Chlamydia	
Subject to a Child Protection Plan (CPP)	
Involved in gangs	
Affected by child criminal exploitation	
Affected by substance misuse in close family / household	
Ever been affected by domestic abuse	
Met goals agreed on care plan at discharge	
Offered continuing support at discharge	
Discharge date	
Discharge reason	

Intervention	
Treatment intervention	!
Date referred to intervention	!
Intervention setting	
Date of first appointment offered for intervention	
Intervention start date	
Intervention end date	

Combined Review Form (CRF)	
YPOR	
Young People's Outcome Record (YPOR) date	!
Treatment stage	
CIR	
Client Information Review (CIR) date	!
CIR stage	
CIR data items	
Sub Intervention	
Sub intervention assessment date	!
Sub interventions received	

NDTMS Core Dataset P: components for YP providers

YP Pharmacological Intervention	
These are substance misuse specific pharmacological interventions which include prescribing for detoxification, stabilisation and symptomatic relief of substance misuse as well as prescribing of medications to prevent relapse.	
YP Psychosocial Intervention	
<ul style="list-style-type: none"> ● Cognitive and behavioural interventions ● Motivational Interventions ● Structured family interventions (including family therapy) ● Multi component programmes ● Contingency management ● Counselling 	
YP Specialist Harm Reduction	
Care planned substance misuse specific harm reduction is not brief advice and information; this intervention must be delivered as part of a structured care plan and after a full assessment of the young person's substance misuse and risks. Specialist harm reduction interventions should include services to manage those at risk of, or currently involved in injecting, overdose or Risky behaviour associated with substance use.	
YP Multi-Agency Working	
Non-structured <ul style="list-style-type: none"> ● Education / training ● Employment / Volunteering ● Housing ● Generic family support ● Generic parenting support ● Peer support involvement / mentoring ● Mental Health ● Offending ● Health ● Sexual Health / Pregnancy ● Meaningful Activities ● Disability Services ● Behavioural Services ● Young carers ● Youth services ● Children's social care ● Stop-smoking service 	Multi agency working lists work done by the substance misuse provider with other services needed in the young person's care package. This work includes facilitating access to the service, arranging appointments or making referrals to the service, working directly with the service in joint case reviews and liaising with the service to discuss the whole needs of the young person. This intervention type is non-structured and should support other specialist substance misuse interventions. If a young person receives just this intervention type they will not be classed as "in treatment".

Intervention Setting	
Community	The setting that this intervention is provided in, if the setting differs from the one that the provider is registered under in the agency table. This field should be used where a provider has multiple treatment settings or where the client is being treated at another setting that would not report to NDTMS. If the setting of the intervention is the same as that registered then this field must be left blank.
Inpatient unit – substance misuse specific	
Inpatient unit – not substance misuse specific	
Home	
Residential unit – substance misuse specific	
Residential unit – not substance misuse specific
