CASE CLOSURE (from caseload)

From caseload closure date

This is the date the client left the caseload. A date should be entered (and the episode closed) if the client goes to prison. If a client's case closure was unplanned then the date of last face-to-face contact with the CJIT should be used. If a client has had no contact with the CJIT for 2 months then, for NDTMS purposes, it is assumed that the client has disengaged and a case closure date should be returned at this point using the date of the last face-to-face contact with the client.
